

HIGH PRECISION & SPECIALLY DESIGNED

FOX ROTARY LIMIT SWITCH

SEE ALL ROTARY LIMIT SWITCHES

Fox can be used for more complex control of all rotating machinery including industrial overhead cranes, elevators, boat lifts, stage & lighting as well as amusement rides and wind turbines. Fox can be configured with different combinations of actuators and motion detectors including cams with microswitches, potentiometers and encoders. Add flanges, pinion gears and mechanical couplings for custom connection options. Assemblies are available with CE, UL, CSA or cURus certification
